

Secure, Ad Hoc, and Serverless Interoperability

Rallypoint and Engage Bridge enabled devices provide flexible, secure, communication deployments that adapt to the needs of the mission

At a Glance

Benefits

- **Scalability:** Easily add new nodes to the network without extensive configuration.
- **Security:** X.509 certificate-based access and encrypted voice communication ensures privacy and protection of sensitive information.
- **Flexibility:** Supports both traditional structured node connection designs, as well as more complex/ad hoc configurations, providing versatility in various operational environments.
