

Expression of Interest: Fudan-Tübingen Science Fair 2023
Exploring the Future in Partnership

20.-22. March 2023, 8 am – 12 pm (MEZ) / 3 pm – 7 pm (Shanghai)

The Science Fair will be held via Zoom.

For over ten years, Fudan University and University of Tübingen have been in a strategic partnership. The 2023 **Fudan-Tübingen Science Fair – Exploring the Future in Partnership** aims to discuss the relationship in an explorative way and find possibly new cooperative formats of exchange and university collaboration.

In the spirit of worldwide knowledge exchange in order to address global challenges, the Science Fair seeks to bring together researchers from a wide range of disciplines and topics in multiple panels. We invite researchers (junior and senior professors) interested in finding potential cooperation partners to introduce their research, the results of joint projects, and/or ideas for joint projects in the future. In addition, a panel for information regarding teaching, research exchange and funding possibilities is planned as well.

Panels will be organized by topics or departments in which participants of Fudan University and the University of Tübingen present their research and ideas in short lectures (15-20 minutes). Time for questions and answers will be set aside in each panel to enter into conversation, identify areas of mutual interest and explore ideas for possible cooperation.

These initial online conversations in March 2023 would lay the groundwork for more focused discussions online or in person, depending on future travel possibilities.

If you are interested in participating in the upcoming Fudan-Tübingen Science Fair please send the e-mail with the following information to info@cct.uni-tuebingen.de by the **30th of September 2022**:

Name:

Department/Institute:

Topic of research to be presented at the Science Fair:

Short description of the research (max.300 Words):

This information will help the organizers of the Science Fair from both universities to arrange the panels according to the topics of interest.

Please Note: Research with dual-use possibilities (i.e. potentially for military purposes) will be excluded from the Science Fair. Please take this into consideration when suggesting your topic.
