

MYMEDBOT SCREENING APP FOR PARENTS

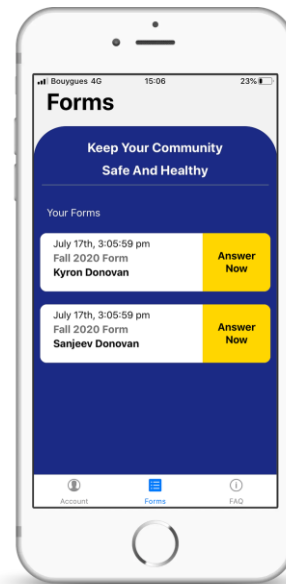

Why should you use MyMedBot?

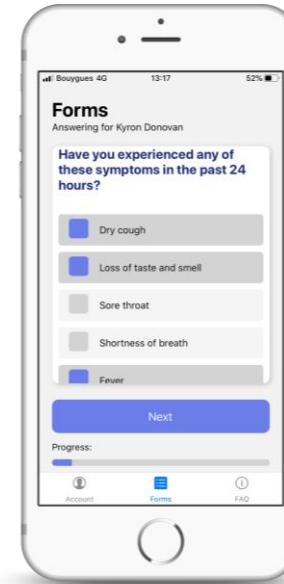

MyMedBot helps schools monitor COVID-19 symptom prevalence and make sure that only healthy children come to school. Parents are notified via a mobile app to indicate their children's symptoms or answer other questions asked by the school nurse. Setup is quick and easy – download the app, enter the invitation code and you're ready to go!

How does it work?

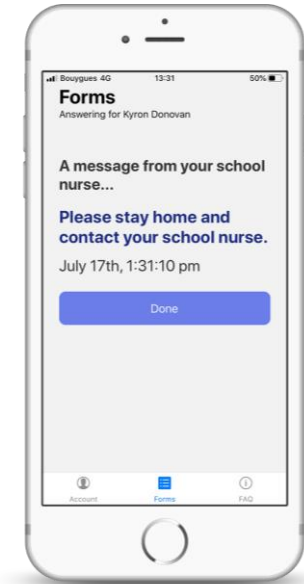

- 1 School health team creates questions.
- 2 Parents receive a push notification to answer questions in the app
- 3 Receive instructions on what to do from your school nurse
- 4 School health team can see responses, monitor prevalence and act accordingly

See forms provided by your school nurse

Answer forms in a few seconds

Receive feedback from your nurse

How is data security handled?

- ✓ Compliance with legal requirements including FERPA in the US & GDPR in Europe
- ✓ Data stored in the United States on encrypted AWS servers, it is not sold to third-parties or given to research-institutions
- ✓ No background location tracking
