

2021 Global Down Syndrome Forum

When: March 16th, 2021

2:00 – 6:00 PM CET / 9:00 AM – 1:00 PM ET

In anticipation of World Down Syndrome Day, we look forward to hosting the first edition of the 2021 Global Down Syndrome Forum. The event will feature presentations from global thought leaders and experts on the science and care of Down syndrome and Down syndrome-related Alzheimer's disease. The increased risk of developing Alzheimer's disease is thought to have a genetic cause and results in an earlier occurrence of symptoms in nearly all people living with Down syndrome.

The presentations during the Forum will span a broad range of topics from the genotype in Down syndrome, the pathophysiology and biomarkers for Alzheimer's disease in Down syndrome, as well as ongoing clinical intervention and prevention strategies.

The event will highlight current initiatives to address the unmet need in this population, as well as the potential impact that clinical successes in Down syndrome-related Alzheimer's disease may have for the broader Alzheimer's disease population.
