## Working Time Example

*Susan has a very small space she wants to scent. She wants it to work Monday-Friday from 8:00 am to 3:15 pm. She would choose the working days grouping that blinks "1-5". She would choose the ON time 8:00, and she would choose the OFF time 15:15. Since she is in a small space, she could start with WORKING 10 seconds and PAUSE 135. She could adjust these settings as needed, WORKING longer periods for a stronger scent intensity and WORKING shorter periods for a lesser scent intensity.*

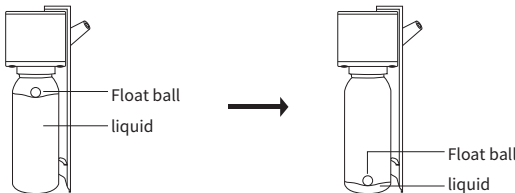

## Machine Reset Settings

Press the reset button for 3 seconds to reset the device.

### Low Fragrance Oil Notification

When the floating ball in the oil bottle reaches the bottom, a low oil voice notification will alert you to add a fragrance refill.

When the fragrance oil bottle is emptied, the machine will stop working.

(Put in Float beads when using)

(Floating ball at the bottom)

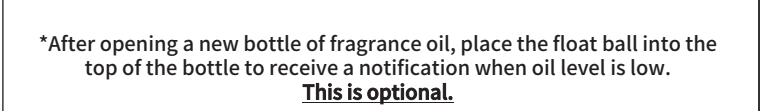

\*After opening a new bottle of fragrance oil, place the float ball into the top of the bottle to receive a notification when oil level is low.  
**This is optional.**

\*\*Please refer to handling and care instructions on refill bottle before installing a new bottle in this machine.

\*\*Use ONLY Topanga Scents fragrance oils in this machine. They have been specifically formulated to work with the Big Sur. Do not use other oils. Do not dilute.

### Low-Expense Oil Notification
