

If you are not protecting each Slot Machine on your casino floor from power outages, brownouts, surges, and dirty power, you're likely replacing parts on your games you wouldn't have needed to if the game was protected by a UPS. An unstable power grid or certain environmental conditions can cause unnoticeable power fluctuations that shorten the life cycle of electronic parts.

CasinoTech can provide a comprehensive plan to protect your slot machines from game outages caused by these irregular power micro surges and blackouts. With premier access to multiple brands, competitive prices, and an experienced Sales Team; CasinoTech will provide you intelligent options for all your UPS needs. Volume pricing available!
