Introduction

Humanity confronts complex, multidimensional challenges to the security of the people and the planet we live on. In spite of unprecedented and remarkable achievements, our sense of insecurity continues to rise. A fundamental change is needed in our concept of security and the strategies, policies and institutional framework by which we seek to achieve it. It is now widely recognized that reform in the educational system is urgently needed to address these pressing challenges. Effective education should include the principles of Human Security essential to the survival and sustainable development of every individual and to global society as a whole. The human security approach was first advocated by the United Nations in 1994 and has since been applied in hundreds of programs around the world.

This conference examines the relevance and applicability of the human security approach to different fields of higher education. It seeks to generate awareness and initiate active discussion among educators and universities on the central importance of the Human Security Approach as an integral component of higher education. The conference will be followed by publication of papers for widespread free dissemination, preparation of a report on Education for Human Security, and development of new course materials on this subject.

This conference is being conducted in support of HS4A, a global campaign to generate awareness and elicit active support and participation from all major sectors and sections of global society in an unprecedented effort to release and mobilize the untapped energies and capacities of humanity in pursuit of human security for all.

Background

Since 2013, the [World Academy of Art and Science](#) (WAAS) has been working for a paradigm change in education which closely parallels the ideas advocated in the recent UNESCO reports and is fully consistent with the UN's Human Security approach. As the 2021 UNESCO report '*Reimagining our Futures Together*' states, we need a new social contract for education. Education should be a holistic and student-centred experience. Curricula should emphasize transdisciplinary learning. Pedagogy needs to be organized around the principles of cooperation and collaboration. The Academy's research findings and publications are aligned with the principles that the UNESCO roadmap charted out in the 2022 report '*Beyond Limits: New Ways to Reinvent Higher Education*', namely, inclusion, equity, participation of all stakeholders, critical thinking, creativity, sustainability, social responsibility and values.

WAAS established the [World University Consortium](#) (WUC) as a partner institution in 2014, specifically to promote a new paradigm in education, which will provide affordable, quality education to all. Together with a wide range of partner organizations, WAAS and WUC have organized five international conferences at UC Berkeley, Rome, Rio de Janeiro, Belgrade and online. Two of these conferences were conducted in collaboration with UNESCO and two former Director Generals of UNESCO are closely associated with this project. In addition, 15 multi-day curriculum development workshops have been conducted to identify the characteristics of the new paradigm in education and strategies to develop and implement the new model. Several reports have been published based on these conferences and over forty articles have been published on issues related to education.

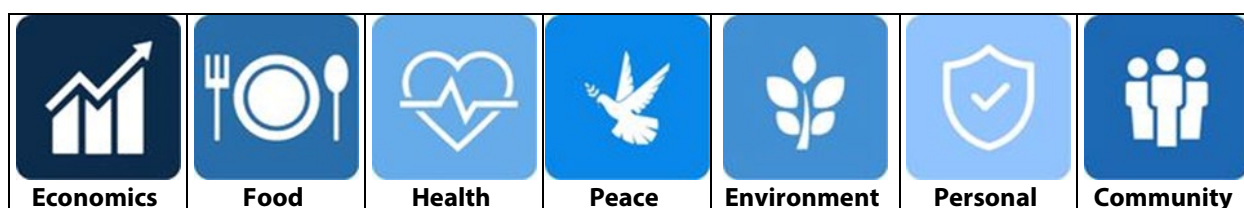

FUTURE EDUCATION CONFERENCE SERIES

Collaborating Organizations

This conference is organized by WAAS, WUC and the National University of Political Studies and Public Administration, Romania (SNSPA), in collaboration with SDSN Europe, a network of 400+ universities, the Black Sea Universities Network (BSUN) of 130+ institutions, the Global Futures Laboratory of Arizona State University, The Jena Declaration, BRIDGES, International Anti-Corruption Academy and other partners.

EDUCATION ON EXISTENTIAL RISKS TO HUMAN SECURITY	EDUCATION FOR HUMAN SECURITY & SUS. DEVT	EDUCATION TO PROMOTE HUMAN SECURITY
Human security is not only a specialized field. It is a perspective that should be introduced into every field of study and activity. How can it be done in your field?	How can education be reoriented to include achieving the full range of interconnected human security and sustainable development needs?	We need an education that fosters a new way of thinking about human security – a new paradigm, which is comprehensive, integrated, and person-centered.
BUSINESS EDUCATION FOR HUMAN SECURITY	TECHNOLOGY EDUCATION TO ENHANCE HUMAN SECURITY	PROMOTING FOOD SECURITY THROUGH EDUCATION
We need an education that identifies the ways in which businesses can foster both human security and sustainable economic development as complementary goals.	Technological innovation is one of the most powerful agents for enhancing capacity to meet the full spectrum of human security needs. What innovations are emerging or needed in your field?	Innovations in education can promote further technological, organizational, policy and other catalytic strategies to eradicate hunger and nutritional deprivation.
HUMAN SECURITY IN CLIMATE/ ENVIRONMENTAL EDUCATION	PROMOTING EDUCATION FOR HEALTH SECURITY	PEACE, HUMAN SECURITY AND COMMON SECURITY
Education for human security must include the whole biosphere since our security depends on the security of not just individuals and nations but of all life on the planet.	How can education foster a positive state of complete physical, mental and social wellbeing, in addition to the absence of disease and infirmity?	Human security and common security are inter-dependent complementary concepts. How can education be reoriented to promote a balanced perspective?
INTERNATIONAL EDUCATION FOR MULTILATERALISM, CITIZENSHIP, PARTICIPATION AND HUMAN SECURITY	EDUCATION IN ARTS & HUMANITIES TO PROMOTE HUMAN SECURITY	EDUCATION TO PROMOTE FREEDOM FROM FEAR, WANT AND HUMAN INDIGNITY
How can political science education be reoriented to place greater priority on laws, institutions, and policies that promote human security for all?	What role can liberal arts education play in advancing social awareness and commitment to human security for all in the minds and hearts of humanity?	How can education be reoriented both in content and pedagogy to promote human rights, dignity, and human security for all?
INNOVATIVE TECHNOLOGY & PEDAGOGY FOR EDUCATION IN HUMAN SECURITY	BASIC SCIENCES EDUCATION FOR HUMAN SECURITY & SUSTAINABLE DEVELOPMENT	EDUCATION FOR HUMAN SECURITY IN THE CONTEXT OF REGIONAL CONFLICTS
Adoption of innovative technologies and pedagogy can dramatically increase access, affordability, quality, and relevance of education to address human security needs.	How can basic science be oriented to enhance the application of research to address pressing human security and sustainable development needs?	How can education promote human security in the context of regional conflicts, social unrest and natural calamities?
