

Bruce Highway bridge repairs – Mackenzie Creek, Cromarty

Lane closures and minor travel delays expected

The Department of Transport and Main Roads (TMR) would like to advise that works are required to repair damage to the Mackenzie Creek bridge, sustained during a truck strike in December 2022.

As a result, northbound lane closures and other traffic impacts are expected on the Bruce Highway at Mackenzie Creek (around 3.12km south of Cape Cleveland Road) from:

Wednesday 4 to Sunday 15 January 2022
Each day between 7.00am and 5.00pm

Works include:

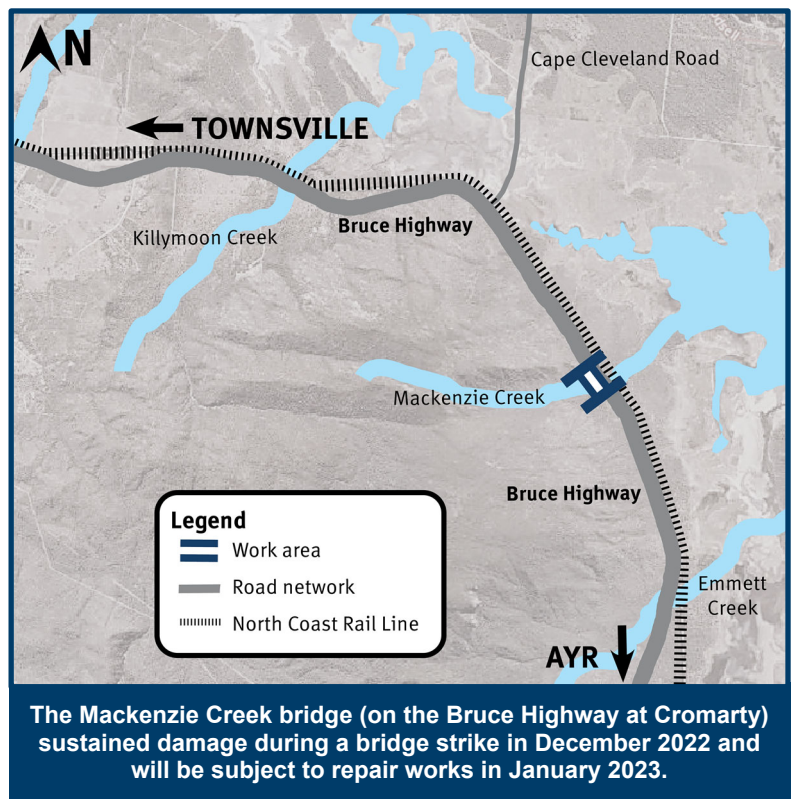

- installation of scaffolding, to ensure a safe work area
- replacement of bridge barriers
- installation of guardrail to replace damaged guardrails.

What to expect:

- noise from machinery
- lane closures, speed restrictions and other traffic control devices
- delays of up to five minutes
- traffic controllers and/or temporary signals to assist road users through the works
- vehicle width restrictions (refer below).

Access to private properties will be unaffected by the works.

All work is subject to construction progress and weather conditions. In the event of wet weather or unforeseen circumstances, these works will be rescheduled for the next available day shift.

Road users are asked to drive carefully through the work area, follow the direction of traffic controllers and adhere to reduced speed limits. TMR thanks you for your patience and understanding during these important works. Should you have any questions or wish to discuss the works in further detail, please contact TMR's Customer and Stakeholder Management team using the details below.

Heavy vehicle width restrictions

Vehicles over 3.5 metres wide are asked not to travel through the work area between 7.00am and 5.00pm, due to the presence of workers and equipment. **Oversize vehicles who must travel at this time are asked to provide two (2) hours advanced notice, by calling Les Figg on 0467 711 587.**
