Duration	4 hours (2 x 2-hour sessions) delivered online
Prerequisites	There are no prerequisites for this course. See below for extra requirements.
Certification	Certificate of Attendance
Fees	\$500 inc. GST

Description La Trobe's online workshop in data visualisation, designed for first time users of Tableau, will

give you the skills to prepare and present data in engaging and informative ways.

Over two sessions you'll be taught by an industry professional with over 10 years' experience to

transform business data into engaging visualisations and use it to its full potential when presenting within an online environment.

You will engage in a mix of case studies, interactive hands-on sessions and presentations

designed to help you understand both how and when to use key functions of Tableau. You can even choose to bring your own data and receive guidance on how to turn it into an effective dashboard.

After completing this program, you will have access to further readings and a recording of the sessions so you can continue to learn as you take your new skills back into the workplace.

If you've ever wondered whether there was better way to present your information than Excel

tables and spreadsheets as new data visualisation techniques have given rise to interactive and engaging experiences for end-users.

Learn how to avoid information overload, improve your presentations, and give yourself a professional advantage.

and its built-in graphs, this course is for you. Using data to tell a story has moved beyond static

Course content You will learn

Best practices in the industry on data visualisation

- Key Tableau features including how to create interactive visuals
 The presence of transferred and interfered interactive visuals with a company of transferred and interactions.
