Aims & Scope

Journal of Management Control (JoMac) is an international journal concerned with the formal, information-based routines and procedures managers use to maintain or alter patterns in organizational activities. Particular emphasis is placed on operational and strategic planning and control systems and their processes and techniques.

JoMac has a strong reputation as a dedicated academic journal for high quality research on all aspects of management control.

Journal of Management Control covers such topics as: the role of management control systems for the management of companies and non-profit organizations; the design and use of planning systems for production, marketing, logistics and other fields of use; the interaction between strategic and operational aspects of management control; the role of management accountants and other internal and external service providers, such as financial accountants, auditors and consultants; change and sustainability of management control systems.

Journal of Management Control especially welcomes empirical and analytical papers reflecting both methodological rigor and practical relevance that make a significant contribution to literature. The journal is interested in literature reviews and meta-analyses showcasing and promoting current academic research. We are highly interested in empirical qualitative and quantitative papers and in new methods and topics not so much covered by mainstream journals. We offer two tracks: original research papers and short survey papers for giving a condense overview of a distinguished stream of research.

Journal of Management Control publishes special issues covering specific research topics such as “Management Control in Family Firms”, “Top Management Impact on Management Control” or “Impact of Corporate Governance Reforms on Management Control”.

Papers are published in English. Submissions must follow the journal’s Style Guide, including formatting, length, and references. Papers are subject to a two-level (editor desk and reviewer desk) double-blind review process which can be tracked by authors on our Editorial Manager® system. JoMac has a traditionally short turnaround time for a first decision on submitted papers. Accepted papers are published “Online First” 20 to 25 days after acceptance.

The JoMac Best Reviewer Award is given each year in recognition of the outstanding efforts and contributions of the journal’s reviewers.

JoMac is available in more than 8,000 libraries and institutions around the world. The journal is published four times a year in print and online at http://www.springer.com/journal/187.
