

Origin & Monadelphous are working together to deliver the Talinga Orana Gas Gathering Station.

Origin and leading Australian engineering group Monadelphous, are working together on the construction of the Talinga Orana Gas Gathering Station (TOGGS). Located between Chinchilla and Miles, the project kicks off in July 2019.

Together, we're serious about making sure we have a positive impact on the local community and the surrounding areas. That's why we'll ensure you have all the information you need about the project, including whether there are any opportunities for you to get involved.

You're invited to the upcoming information session where you can learn about key milestones, meet representatives from both organisations and ask them any questions you might have, and hear about other Monadelphous activities in the region.

- A meet and greet session begins at 5pm, followed by a more formal presentation at 6pm.
- We look forward to seeing you at the **Chinchilla RSL on Thursday 6th June from 5pm.**
