

Marene N. Allison, Vice President and Chief Information Security Officer, Johnson & Johnson

Ms. Allison is responsible for protecting the company's Information Technology (IT) systems and data worldwide through elimination and mitigation of cybersecurity risk. This includes ensuring that the J&J information security posture supports business growth objectives, protects public trust in the J&J brand, and meets legal/regulatory requirements. With 265 companies in 60+ countries, J&J is a leader in consumer health, pharmaceutical products, and medical devices worldwide.

Prior to 2010, Marene was Chief Security Officer and Vice President for Medco, where she oversaw all aspects of security and regulatory compliance. As head of Global Security at Avaya, Marene secured the World Cup network in Korea and Japan in 2002. She also worked as Vice President of Loss Prevention and Safety for the Great Atlantic and Pacific Tea Company. Before that, Marene was an FBI Special Agent, working on undercover drug operations, terrorist bombings, and a mock nuclear terrorism exercise.

Marene has a Bachelor of Science degree from The United States Military Academy at West Point in the first class to include women. She has served in the US Army in the Military Police, as well as on the Defense Advisory Committee on Women in the Services and the Overseas Security Advisory Committee. Marene is a founding member of West Point Women and currently serves on their Board of Directors. She is also on the Board of Directors for H-ISAC (Health Information Sharing and Analysis Center) and ASIS International. Marene is married, has a son, a wonderful daughter-in-law and grandson, and lives in Bucks County, Pennsylvania.
