

WE'VE GOT YOU COVERED – WITHOUT THE \$65 FEE

WHY NOT SELL MEMBERSHIPS?

- Our Patient Advocacy program works with all patients, regardless of insurance (even those without insurance), to make sure that out-of-pocket costs are affordable for them.
- Our average out-of-pocket cost in Nevada is \$232 (including co-pays and deductibles).
- Medicare Part B and Medicaid cover our lifesaving care, and those patients will never receive a balance bill from us.
- We also have in-network agreements with Anthem NV. Our patients covered under this plan will never receive a balance bill from us.

MISPERCEPTION	REALITY
If I don't have a membership, the air medical provider won't transport me if there is an emergency.	A membership is not needed in order to be transported. Air Methods will transport any patient that needs our service – regardless of membership status or ability to pay.
If I don't have a membership, I – or my family – will get stuck with a major bill from an air medical transport.	This may be true for other air medical providers, but Air Methods' Patient Advocacy team is committed to working with all patients, regardless of their insurance situation, to find a solution that works best for them. Our average out-of-pocket cost in Nevada is \$232 (including co-pays and deductibles).
A membership is insurance and will make sure that I don't have to handle insurance claims.	Memberships are not insurance as they are not regulated, and they don't eliminate the need for you to file with insurance and work through the insurance process.
If you have a membership, you can choose to fly with that particular air medical provider.	Air medical services are intended for emergencies only and, because of this, the closest, most appropriate air medical provider should be called. This may not always be the air medical provider that you have a membership with. With Air Methods, it won't matter. We don't have memberships and will transport anyone, then work with them to ensure that out-of-pocket costs are as low as possible.
